The black circles on the sketch represent the guard towers, made of concrete, 3 by 3 by 8 meters. The guard on duty there is armed with a Tommy gun. The tower is equipped with a searchlight in case the electricity does not work.

2. The prisoners at the Mielecin labor camp are mostly political prisoners, kulaks and deserters from military service. The total number is approximately 800 persons (men and women). They work in the shops listed under paragraph one of this report (Nos. 4, 5, 6, 7, 8, 9). [redacted] in No. 8, [redacted] hexagonal plates for airfields are being made. The daily quota for one prisoner was 45 plates. The prisoners worked in two shifts. In the building marked Nos. 7 & 8 approximately 12 tables were set up, with four men working at each table, so the daily quota of production for the two shifts amounted to approximately 4,300 plates (size 45 by 48 by 2). The plates were shipped to Krasnystan (Lubelskie).
3. [redacted] the labor camp at Jaworzno [redacted] served as a prison for juveniles who had been sentenced for fighting, theft, etc. [redacted] Those juveniles were between 17 and 20 years old.
